What Do the County Commissionfarming out the county paupers, hoping that it might come to the attention of the County Commissioners, and be remedied by them. This abuse of the public trust has not been apoligized for, neither have there been any signs of amendment, so far. But as we really hope something from this Board, really hope something from this Board. they could not commence upon a more praiseworthy subject than that of the amelioration of this county Poor House injustice.

We stated before and we reiterat: it now that Mr. Scott, dubbed "Doctor" by virtue of the postession, and perhaps perusal of "Gunn's Domestic Medicine," has no right to take charge of sick cases, nor any right to use his judgment when patients require the services of a physician, The addition to his collection of the very admirable practice of medicine and other good books, does not yet entitle Mr. Scott to the knowledge and skill necessary to conduct a county hospital where all classes of cases are sent, although it shows praiseworthy literary aspirations.

As an act of humanity, the medical supervision of these unfortunates should be under the charge of a medical man, in no way interested in the profits arising from the care of them. Were Mr. Scott the most competent physician in the county, he should not be tempted to do wrong by holding the duplex office of physician and poor keeper. There is no doubt that the poor-house is kept nicely cleaned and whitewashed, but it does not follow because the keeper is an ertist with the scrubbing, or white-wash-brush, that he can tell a case of progressive locomotorataxy from ground-itch, and surely no reason why these paupers
